

Chassi, Cassandra 2 days ago

to me ▾

Thank you so much for your time, talent, and patience you have given me while teaching me the subject of math. My name is Cassandra Chassi, I am in Grade 11 and I am located in Toronto, Ontario. You have made a difference in understanding and knowledge for the subject. I do enjoy the way you teach the lessons in a very thorough format and how you explain any questions I have even on the online sessions. I do enjoy that you make an effort in having your students listen during your lessons by asking questions and making sure they are to respond. Overall it was a pleasure having you as a tutor and I would definitely recommend you for other students and parents. Thank you again.

I would like to recommend Tanya Kapur as a fascinating tutor . She is highly professional. My daughter of year 9 at school starts to learn mathematics of year 11 with Tanya Kapur and her progress is absolutely incredible.

Tanya Kapur starts to teach my daughter from really basic things but constantly pushes her up . Also I really like how Tanya Kapur checks my daughters homework and at the beginning of each class they do revision of mistakes. Only after that they do next steps

I highly recommend Tanya Kapur as a tutor

Tanya Kapur has been teaching me circular functions which is one of the hardest chapters in Math Methods. I am currently a year nine student (Australia) and after twelve lessons with Tanya Kapur I've had massive improvements with circular functions. I have had different maths tutors in the past and can say that Tanya Kapur is easily one of the best I've had. I would definitely recommend her to anyone who is getting ready for any type of math exam or simply wants to improve in this subject.

Sathya Reddy 07:48

to me ▾

Hello, my name is Sathya Reddy. I am a grade 12 student located in Brampton Ontario and Tanya taught me calculus and vectors. Personally I do like her way of teaching, I find it very descriptive and interactive with me as the student much like in a real classroom environment. I think that the online sessions went very well and due to how informative and helpful the sessions were to me I would recommend Tanya as a tutor to other students and parents.

Thanks for the very helpful tutoring sessions.

Geeta Reddy 17:03

to me ▾

We are located in GTA and Tanya tutored my son Sathya (Calculus and Vectors-grade-12) for about a month. She was punctual, reliable and made her lessons engaging. My son scored 90 in this course.

I am very satisfied with the amazing service and the compassionate Tanya. I wholeheartedly recommend her to all parents and students.

Hi Tanya

We are extremely satisfied with your teachings for my kids. My elder son Shiva in 5th grade and younger son Srihari in 2nd grade enjoys your math classes. They picked up very well and are getting trained to the best. We tried many different tutors and in person classes here in Fremont, California but none of them turned out well for us. Finally we could find you as their best tutor and we are happy. Their math grades are going up.

Thanks

Hi I'm Poonam from Scotland (UK)

***My son Ojas has been having Grade 4 (P4) lessons with Tanya for a few months now. Her lessons and teaching methods are fantastic. She's kind, enthusiastic and keeps the lesson interesting. My sons understanding & confidence have improved immensely. His recent schools results were amazing and so much higher than he was predicted. He is feeling so empowered now. Can't thank Tanya enough for her continuing support! Highly recommend xx
Many thanks
Poonam***

Tanya has been exceptional in her tutoring with my 11, 9, and 6 year old. She is genuinely committed to their learning and continually challenges them. We have seen concrete results in their school grades since starting with her. We would recommend her to any parent who wishes to see their children succeed.

Hannah Elias Yesterday

to me ▾

Hi! my name is Hannah Elias and I am a Concordia University student located in Montreal, Quebec. Tanya has taught me organic chemistry. Her ways of teaching are the best I've ever had as they are interactive and the lessons are always made very clear. She explains difficult topics in a way that makes them seem simple. We complete problems together, which allows me to learn the correct steps. I highly recommend Tanya as a tutor in any subject as good tutors are hard to come by and she is like no other.

I am a second year student at University of Waterloo, and Tanya was my Organic Chemistry tutor. She helped me understand specific concepts and took me through practice questions step by step. She is very patient, and interactive. She will pause when necessary and go over anything that is still confusing. She uses a wonderful online software to draw out each organic molecule and show each step of the different types of reactions. I would recommend her to other students because she is very clear and helpful.

Hi Tanya

Thank you so much for your help.

What an amazing improvement from her.

I was wondering do you think it would be okay if I give her math teacher your email address.

I wanted to tell him how amazing you are and if he has future students that need help maybe he can recommend you to the students and parents?

Would this be okay to do?

Hi, My name is Shifa and I am from Australia. Maths was boring subject to me before I met Tanya mam. She motivated me at every step and explained me so nicely. Tanya mam is very friendly and easily recognises when I am stuck with my maths work. She always gives me clues that I can easily remember the next step. Such a pleasure to have her. I recommend her to every student who is struggling with maths. Thank you Tanya mam

Tanya has worked with my daughter Shifa tirelessly tutoring her in Maths. As a result Shifa's marks have improved significantly and she is enjoying the subject math and has greater confidence tackling new problems. We look forward to continuing our working relationship with Tanya, she has far exceeded our expectations and have no hesitation recommending her to others."

Hi,

Thank you Tanya for your time and effort while teaching me Introduction to Programming in Python. Your teaching has made my concepts very clear and has made learning programming very enjoyable. You made sure to cover each topic carefully making sure that no corner case or exception is left and that I completely understood what you taught.

I would definitely recommend you as a teacher for other students as you truly made my first semester in college a much easier journey being a great teacher.

Thanks and regards,

Thank you Tanya
I am watching the way how you teach
my daughter. And I able recognise
that you are a good tutor. Only for
this reason we continue classes with
you .

Things are going very well with his learning, I am sure it will continue to be that way. I will definitely endorse you within my circle and you can give my reference if any parents wants to talk before starting.

22:31

You are very intelligent and smart working, you will definitely be very successful!!

22:32

+1 (669) [redacted]

Pls send me the scanned copy of the HW worksheets once the kids are done doing the HW

21:18 ✓✓

You teach well and so charging good. I have no issues with fee. Other tutors charging less but not much use as they are just going through questions and answers

21:19

+39 [redacted]

Havent introduced him to the combination of trigo and calc yet

23:42 ✓✓

Sure, I am more confident on you!! He was very happy with your sessions, way of teaching and pace.
